MESSAGE OF THE PRESIDENT

Dear friends,

As sportspeople, we are used to measuring time, scores and performance, whether in training or competition. When these statistics are collected, they provide an essential record of our development. This is no less true for the organisations involved in sport.

I am proud that we can now share with you a statistical record of participation in FISU's competitions that spans 60 historic years. It shows our development, to the point where we have become a truly global organisation whose reach also extends across an impressively wide range of sports.

However, I encourage you to also think beyond these statistics. The participation of each university athlete goes far beyond their time, score or result. In so many cases, it is life-changing. The almost infinite variety by which participating in international university sport events improves lives is not something that can be quantified. But its impact is there, beneath all of the tables, charts and graphs in this handbook.

The opportunity to help improve so many young lives motivates us to look at these statistics and then, as sportspeople, to commit ourselves to do better. Please accept my thanks from all of us at FISU for your part in creating a present and a future that is even more impressive than our past.

Best wishes,

Oleg Matytsin
FISU President
